THE REVIEW-ADVERTISER
WISHES ALL ITS READERS
A VERY MERRY CHRISTMAS

Christmas mails have been very heavy this week at Claresholm.

Lloyd, son of John Reynolds of Granum, is a patient in the local hospital this week.

Hoot Gibson in "Painted Ponies" at the Rex theater Friday and Saturday nights this week.

Philips, one of the British boys attending School of Agriculture here, is laid up with chickenpox.

Frances, three year old daughter of Gilbert Gunderson, was a patient in the local hospital this week.

The Claresholm Garage has everything in readiness for ice advance showing of the new Ford car on Saturday.

Mr. and Mrs. J. B. Humphreys are spending Christmas with Mrs. Humphreys' sister, Mrs. Carl Grobe, at Ogden.

Claresholm schools closed today for the Christmas holidays. Most of the teachers have left to spend the holidays at their homes.

The term closing dance at the School of Agriculture was held on Thursday night. Many of the students have gone home for the holidays.

Claresholm Elks are again putting on a Christmas entertainment and treat for all children, at the Rex theater Saturday afternoon, December 24, at 2 o'clock.

Monday and Tuesday next the picture at the Rex theater will be "Rise of the Golden West" with Mary Astor and Gilbert Roland. This picture has just finished a run at the Capitol theater in Calgary.

Two members of the British boys' class from the Claresholm School of Agriculture, along with Instructor Cormack, have entered in the Calgary Herald Christmas road race. Eric Branson and Wm. E. King are the entrants.

On Monday evening a shower for Miss Jessie McKenzie who is shortly to be married, was given at the home of Mr. and Mrs. Leonce Clark, about twenty guests being present. There were numerous beautiful and useful gifts. The evening was spent very pleasantly in social pastimes, and dainty refreshments were served.

Fine winter weather has been with us the entire past week. Saturday, Sunday and Monday there was a moderate chinook, which melted the snow considerably. Tuesday was slightly colder. On Wednesday morning the mercury dropped to almost zero, and on Thursday morning it was a shade below zero, and a little above zero on Friday morning; but there have been no storms and the days have been sunny and pleasant—really ideal winter weather.

Stavely Wins Football Cup

Stavely curlers came down on Tuesday with two rinks to take up their challenge for the Foot-hills Trophy which has been held by Claresholm for the past year. The Stavely rinks were skipped by W. H. Blayney and E. Overand, and the local skips being C. J. Braren and D. A. Anderson.

The Blayney rink won from Braren 18 to 7, and Overand from Anderson 16 to 9, the totals being 34 to 16; and Stavely now holds the cup. The personnel of the rinks was as follows:

Stavely—F. Coons, F. Macchew, W. Finlay, and W. H. Blayney, skip; J. Robinson, C. R. Miller, Dr. Stewart, and E. Overand, skip.

Claresholm—A. C. Carney, A. Amundsen, R. Dickson, and C. J. Braren, skip; F. Murray, H. Baker, A. Laurie, and D. A. Anderson skip.

Doctors McMillan and Carroll Install Up-to-date X-Ray Machine

Doctors McMillan and Carroll have recently enlarged their offices to provide for the installation of a Victor Soudok ten-inch X-ray machine and necessary equipment. This is the largest type of machine used for radiographic work and is identical with that used by two of the leading radiologists in Calgary and Edmonton.

The equipment includes a complete radiographic and fluoroscopic Victor table which enables any desired position to be obtained, from horizontal to vertical, or any intermediate position, both straight and stereoscopic. A movable fluoroscopic screen is attached which is invaluable for the diagnosis and reduction of fractures as well as in the examination of the chest gall bladder, and alimentary tract.

The equipment also includes a Potter Bucky diaphragm which is essential for taking proper radiographs of heavy parts of the body such as the skull and pelvis.

In addition there is a complete stereoscopic unit without which it is impossible to locate various obscure conditions, particularly those of the chest.

This equipment together with the 55000 volt high frequency electrical machine and a complete air cooled and water cooled ultra violet lamp which were installed a year ago, constitutes the most complete electrical equipment in the district between Calgary and Lethbridge.

The X-ray work will be largely in charge of Dr. Carroll who has recently entered into partnership with Dr. McMillan. Dr. Carroll was for twelve months in charge of 1923-24 in charge of the X-ray department while assistant superintendent on the staff of the British Columbia provincial sanatorium at Tranquille, a 350 bed institution which is double the capacity of Keil's Sanatorium. Previous to this he was for two years a resident house surgeon in the Winnipeg General Hospital. Since leaving the sanatorium Dr. Carroll has been engaged in general practice for three years.

First Hockey Game on Local Ice Results in Tie

The first game of the season on Claresholm ice, in the Foot-hills Hockey League, on Thursday evening, played between Macleod and Claresholm, resulted in a tie, 4-4. About 500 people were in attendance.

It was a fairly fast game, though the home team evidently lacked practice. Claresholm scored two goals in the first period and two in the second. Macleod one goal in the first, one in the second and two in the third. Neither team succeeded in breaking the tie in the five minutes additional allotted each.

Murray Palmer made his presence on the ice felt, by scoring three goals out of the four—two in the first period and one in the second. Hare scored one in the second.

Harry Paulson did good work in goal. But for his brilliant goal tending Macleod would have run up a larger tally.

The Claresholm Band entertained the occasion with good music. Following was the lineup:

Claresholm—Paulson, goal; McDonald, McGregor, Hare, defense; Petral, Palmer, Amundsen, Thompson, Parsh, forwards.
Macleod—Murphy, goal; McDonald, Hamilton, Kirk, defense; Hamilton, Townsend, Dillingham, McDonald, forwards.

Cuticura Baths Best for Children

Teach your children to use Cuticura Soap. It is the best for their tender skin. Assisted by occasional applications of Cuticura Ointment to first signs of irritation, it cleanses, keeps the skin soft and healthy, cures dandruff, eczema, and itching.

Small Box Free by Mail. Write for Sample. Cuticura Soap and Ointment, P.O. Box 100, Portland, Maine.

Promoting Health—Preventing Disease

The subject of immigration is creating widespread interest throughout Canada. The newspapers are full of it, churches and organizations of all kinds are discussing it, Governments, Federal and Provincial, are deeply concerned about it. In particular, there is much debate as to whether Canada is receiving the number of British-born immigrants in proportion to the number of foreign-born essential to a proper assimilation of the latter and the maintenance of British life, customs and institutions in this Dominion.

The two main points now being greatly weighed up, over the alleged lack of British settlers more than a passing thought to know in our Canadian-born population which could be prevented if they and others would but exercise the necessary caution. Last year, for example, according to the Canadian Social Hygiene Council, based on careful study by expert statisticians and investigators, the total number of infant deaths in Canada was greater than the entire immigration from the British Isles.

Why, it may well be asked, go to so much trouble and expense to bring in people and send them to places where they would be established in this country while at the same time neglect those simple precautions which would result in saving the lives of babies in our Canadian homes? Is it a case of ignorance on the part of people and indifference resulting from lack of interest?

Since the war the Canadian Red Cross Society has conducted a persistent campaign for the improvement of health, the prevention of disease, and the cultivation of hygiene with the aim of saving lives. It has been successful in its efforts. The Canadian Tuberculosis Association, for example, has with equal vigour sought to arouse and educate people with the facts relating to the great white plague. For three years past, research workers at the Canadian Social Hygiene Council have studied, studied, and studied with preventable disease and are now about to embark on a Dominion-wide campaign of education in an effort to secure the active interest and co-operation of the people of Canada.

At a recent session of the Council's research work they have ascertained that almost fifty per cent. of present-day illness is not necessary. It has been found that in Canada, there are 134,000 deaths in each year and that, therefore, one-half of the population, or 67,000, die each year. This is a very high percentage, and it is estimated that the total cost of illness to the Dominion of Canada each year equals 75 per cent. of the Federal Government's total expenditure during 1924, or \$250,000,000.

This is by no means all. It has been established that preventable illness is the cause of a great many social problems with which at first glance, it may seem to have no connection. Preventable illness brings preventable death and inevitable death breaks up the home. These research workers have suggested the question of preventable diseases and found that a large proportion of the cases caused by the juvenile course came from homes disrupted by preventable death. Preventable death brings poverty in its train and poverty results in increased crime and social problems.

The most important factor in the present is the fact that the foundation of health in business, industry and agriculture is being weakened to such an extent that health is a business problem; that they need their companies, their employees and their customers, are now feeling the effects of a result of unwholesome habits. While from the immediate aspect of the health problem, it is true that the general public is more generally realizing that preventable illness is imposing a huge financial burden on the nation and on the nation's business in all its many departments.

The Canadian Social Hygiene Council, the Red Cross, and other health agencies are agreed that it is now time for another great war—a war against illness. They are engaging in a campaign of education for recruits just as Hitler and other enemies are engaged in a campaign of recruitment. It is well the people realize that in their thousands in a war to save life as they did in a war to destroy life. If the average man and woman can only be made to realize that preventable illness and preventable death will make an epidemic of typhoid impossible, that cholera, diphtheria, scarlet fever and other infectious diseases can be controlled and gradually wiped out as completely as typhoid or yellow fever, then they are going to go to it that their children and their families may live.

Science has made possible the accomplishment of this highly desirable objective. It remains for the people to follow themselves and profit by the information which is so readily available to them.

Canadian Chamber of Commerce Will Invest in Canadian Lands.

Approval At Montreal Session. The constitution of the Canadian Chamber of Commerce, which was referred by the Vancouver convention to the national executive committee, was approved at a recent session of the executive at Montreal.

It was also agreed to ask the Federal Government to appoint a commission to investigate the fisheries of B.C. with a view to their conservation.

A committee of commercial exploration has been appointed by the national executive under the chairmanship of George H. Burr, K.C., of Toronto, and President of the Canadian Chamber of Commerce. The committee will study commercial activities as to its application in Canada.

After nearly 10 years work, the thirteen lake automobile highway between Tokyo and Yokohama has just been opened.

Regarded Trip As Adventure

Family Traveled From D.C. To Montreal In Truck

Fifty years ago Canadians trekked across the continent in arduous and slow stages. Today they cross in automobiles and ten trucks. For the second time this season a family arrived in Montreal after a transcontinental trek in a one-ton truck.

Arrived to visit the Emerald Isle, the family of Mr. and Mrs. J. J. Troughton, an Irish family in Canada, W. J. Troughton, an Irish farmer, his wife and five children, whose ages range from seven to 15 years, left their homes in Pennsylvania, in a one-ton truck and motor, and arrived in Montreal in 23 days, where they embarked on the "Windsor" for Belfast.

The fact of transporting his family involved a big task, as Mr. Troughton had to convert his truck into a sleeping quarters for his family. He converted the one-ton truck into a temporary home, fitted it with mattresses and blankets, and he and his family slept on the long trip.

The family looked exceedingly well when they arrived and as they enjoyed the trip, they were all in good health. They regarded the long trip as a great adventure.

Cuts and Bruises Disappear

Was One Of World's Heroes

Man who Suffered Seven Years in Baffin Island

The death of Hector Pitelofsky, known as "the world's loneliest man," reveals a story of self-sacrifice and courage, worthy of a place beside those of the world's greatest heroes.

A very moving story of his lonely life in the Arctic wastes of Baffin Island.

Hector Pitelofsky was an English university graduate, a real scientist, specializing in geology and astronomy.

During the war he was an officer on a British minesweeper which was torpedoed, he afterwards received an English trading company in his remote Atlantic port for seven years.

The hospitable barbers of Iceland up the vessel coming to him with fuel and provisions, and, after waiting for a year or over, he ascertained that it was thought, cold and starvation.

Baffin Island can well be called the loneliest spot in the world. It is between Greenland and Canada in the Arctic zone. The temperature is sometimes 50 or more below zero, and the sun seldom or never rises in July.

New Comet Discovered

Is Enormous Distance From Earth Say German Professors

A new comet invisible to the naked eye, situated in the constellation of Pegasus (the Pegasus), and with the brightness of a star of the thirteenth to fourteenth magnitude, has been discovered at Hamburg, Germany, by Professors Schvarzschild and Waisch.

The comet appears on the photographic plate as a nebula formation with a distinct nucleus. Its daily movement had been very slight, proving that it is at an enormous distance from the earth.

ANSWERS TO LAST WEEK'S QUESTIONS

323. The Meaning of an Inch of Rainfall?
 Means a gallon of water spread over 2 sq. ft., 113 tons per acre 18,000 tons on a 100-acre farm. The United States is a whole averages 27 inches of rainfall a year—18,000 tons on 100 acres. An average rainfall of 6 inches in July instead of 5 means a \$400,000,000 increase in value of the corn crop alone. A moderate hard shower means a fraction of an inch. May 1, 1908, at Porto Rico, latitudes of Panama, 2 1/2 inches fell in 3 minutes, 6 inches in 2 hours—700 tons per acre. During a very rainy day in July 1925, Richmond, Va., had a 27-in. rainfall. At a point in the Philippines in 1911 46 inches fell in 24 hours—believed a world's record.
324. What Part of the U. S. Has the Most Rain?

The rainiest place in the U. S. (outside the world) is in the Hawaiian Islands. The average annual rainfall of 455 inches. Within the U. S. proper, Tallapoosa county, Oregon, leads with 135 inches. Various sections of the Rockies in Marion county, N. C., on southern slope of the Blue Ridge, with average 35 to 50 inches. North Middle States, 30 inches; Southern States near the Ohio river, 45 to 50 inches; Gulf states, more than 50; plains states less than 30; North Dakota has 28 inches, but averages 30 inches of snow (equal to 3 to 5 inches of rain). Pacific valley, in Oregon and Washington 40 to 50 inches.

325. The Least Rain?
 The rainfall diminishes westward on the slopes of the plains; most of the Rocky Mountain region ranges 10-20 inches; in the Great Basin and southwestern Arizona is commonly less than 10 inches; and in some localities no rain falls for years. Along Pacific coast ranges from 50 in northwest to below 10 in southern part. Driest section of the U. S. is the interior of California, where numerous sections average less than 3 inches. Death Valley, the driest of all, has a 7-year average of 1.65 inches at Grenadier Ranch Station, which also holds the U. S. record for high temperature. There is no place in the U. S. not having at least some rain.

326. How Much Actual Wood in a Cord?

While a cord of wood is measured over all (48x68 feet) measures 128 cubic feet, the space between sticks diminish this very considerably. "Stove-fitted" wood (12 or 16 inch length) piles closely. "Cleft wood" means the cordwood sticks as a part of a split trunk, has a flat side and is 4 feet long; usually runs 80 actual cubic feet to the cord; straight, round wood 5 to 10 inches in diameter will run 85, but crooked limbs, with many joints, so small that the number of spaces are greatly multiplied, fall to as low as 45 cubic feet. A cord of wood "on the stump" (as timber) is assumed to contain 750 board feet (12x12x1 in.).

327. The Fuel Value of Wood Compared With Coal?

Fire wood is little used in the U. S. today except on the farms, where it is the chief fuel, and in towns of 3,000 and under. An average cord of "stove-fitted" hardwood (oak, hickory, maple, birch, beech or ash) is equal in heat value to a ton of the best anthracite coal. While it takes 2 1/2 cords of white pine to give the same heat, yet for a quick, brief fire in the kitchen stove, or for a forced fire, it gives more for the money than hardwood gives. Fire wood rarely costs per heat units obtainable what coal costs. "Stove-fitted" hardwood at \$10 is cheaper than hard coal at \$20 or soft coal at \$10.

328. How to Burn Wood Economically?

Even dry fire wood contains 25 per cent of its original moisture. Wood splits best when green—even better when frozen. Should be left in open first 3 months months, when it will be 85 per cent cured; in 9 months 90 per cent; in 12 months ready for use. Birch should always be split. For day use split wood is best, as it fires fast, the area of contact is large, drafts may be closed and a good heat obtained with little fuel. With round chunks drafts must be open and most of the heat disappears up the chimney. To keep fire at night, round sticks (maple) are best; green wood may be piled on top the dry wood which keeps fuel in reserve, since green wood will not ignite until partially dried.

329. What Kinds of Trees Should Be Used as Fuel?

Using for fuel splendid oaks, maples, ashes, etc., that could be converted into fine lumber for furniture or oak and maple flooring should stop. Deformed trees, trees too small for lumber, or trees that would otherwise fall and not can be removed with great advantage from any normal forest where the trees are struggling for soil, water and sunlight, and the growth of the remaining trees accelerated to an extent simply amazing. Forest tracts properly thinned standing alongside tracts of same age not so thinned, have outstripped the latter in a dozen years so as to appear 40 years older, the trees being that much larger.

VALUES COMPARED

Hundreds of thousands of American magazines are sold to Canadian homes each month. The average cost is 25 cents per copy or three dollars a year. Compare that with a worth-while Canadian publication, combining a weekly newspaper covering the world's news, a family magazine with which few, if any, of the 25 cent monthly magazines can compare in supplying every member of the family, old and young, with the very purest and cleanest literature, trust and serial stories, and hundreds of other features of great interest every member of the family, and an agricultural journal vastly superior to any purely agricultural papers in this country. All these three are included in one big 72 page paper, and sent every week instead of monthly to the reader, at the small cost of one dollar a year for the 52 issues, instead of three dollars for twelve. The Family Herald and Weekly Star of Montreal is the publication referred to, the greatest dollar's worth on the Continent. Why not patronize home industry?

Hockey Schedule

THE PEOPLE'S FORUM

Milk a Little Up

The scarcity of feed, owing to much of it, it, set with wheat, being buried beneath the snow, is bringing up the price of milk to a cream, more or less, everywhere. But in Claresholm milk has, as yet, only raised one cent, and cream has come up to about an equal value of milk, having for a long time been far below, which imposed an injustice upon those selling this very important article of food.

The NEW CAR

Advance Showing

In this advance showing you will find the ultimate expression of automotive engineering and design. You will find a new standard by which every other automobile, large or small, low priced or expensive, will be measured.

(Whatever you do, set aside sufficient time to visit this advance exhibition of the New Ford car at your local Ford Dealer's showroom on)

Saturday, December 24

CHURCHES

UNITED CHURCH

The heart of Christmas is religion. Let us give it this emphasis as well as the social. As much as possible let Claresholm gather in the various services of worship. The United Church services will be at 11 and 7-30, with Sunday School at 12:15.

May you have a happy Christmas, mass, finding a new experience of God's care in your life!

HOCKEY

(Continued from first page)
Previous games in the Foot-hills Hockey League schedule have resulted as follows:

Last Friday night at Gratum the Gratum team defeated Macleod 7 to 1, in the opening league game.

Monday evening Clareholm played at Macleod, losing to the Macleod team 4 to 2.

Tuesday evening, Gratum and Pincher Creek played at Gratum the Gratum team winning 5 to 1.

Alberta Boys' Parliament Will Meet in Calgary

During Christmas week sixti-six representative boys from all parts of the province will assemble at the city hall in Calgary for the Eighth Alberta Boys' Parliament. From Grande Prairie and Peace River in the north, from Cardston in the south, from Banff and Coleman in the west and from as far east as Lloydminster and Empress will they come. The boy members are the elected representatives of the Trail Rangers and Tuxis Boys of Alberta and their duty is to represent and to voice the opinions of their youthful constituents. Their legislators will largely deal with problems of boy life and with the Trail Ranger and Tuxis programs.

Robert Bond of High River is premier of the parliament. Russell Berscht of Didsbury leads the opposition and W. H. (Bill) Swift of Tofield, an exponent, is speaker. The Alberta Boys' Work Board sponsors the parliament and the executive secretary of that board, Gordon Lapp, has acted as chief returning officer in the elections just concluded.

During their stay in Calgary the boy members will be lodged in the homes of interested people and on different occasions will be entertained by the Calgary Y. M. C. A., the Alberta Boys' Work Board and the Calgary Kiwanis Club. On Thursday evening, December 29th, through the courtesy of CKLC, the Alberta Pacific Grain Co., the debate in the parliament will be broadcasted.

Members from this district are Stewart Ferguson, Clareholm; Kenneth Blair, Gratum; Harold Stephenson, Champion; Herb Limley, Vulcan.

WANTED TO BUY

Furs, hides, pelts, wool, horse hair, rabbits, etc. Highest prices paid. Call at residence, south of box farm, or Phone No. 218—C. W. McDaniel, Clareholm.

ESTRAY

Give a Hotpoint Toaster

EVERY day in the year—and for many years to come—a Hotpoint Toaster will be a reminder of your good wishes. Turn the toast automatically and makes it just right. Beautiful in design and finish.

Another PRICE Suggestion Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

MAPLE NUT CAKE

1 cup shortening
1 cup light brown sugar
2 eggs
1 cup milk
1/2 cup flour
2 teaspoons Dr. Price's Baking Powder
1 cup chopped nuts—preferably pecans
1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolk of egg and milk and beat well, sift flour, salt and baking powder together and add chopped nuts, fold in beaten whites of eggs, add flavoring. Bake in well greased loaf pan in moderate oven 35 to 45 minutes. Cover top with maple icing and sprinkle with chopped nuts while still soft.

MAPLE ICING

1/2 teaspoon butter
2 tablespoons hot milk

DR. PRICE'S
CREAM
Baking Powder

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, giving the food fine texture and rich flavor.

MADE IN CANADA

Send for FREE Cook Book—“Table and Kitchen”—149 Notre Dame East, Winnipeg, Can.

1 1/2 cups confectioner's sugar
1 egg yolk
1/2 teaspoon cream tartar
1/2 cup milk

CHOCOLATE LAYER CAKE

1 cup shortening
1 cup sugar
1 egg
1 cup milk
1 1/2 cups flour
4 teaspoons Dr. Price's Baking Powder
1/2 teaspoon salt
1 teaspoon vanilla extract

Cream shortening, add sugar gradually, beating well, add beaten egg, one-half the milk and mix well, add one-half the flour which has been sifted with salt and baking powder, add remainder of milk, then remainder of flour and flavoring, beat after each addition. Bake in standard layer cake tin in moderate oven 15 to 20 minutes. Put together with

CHOCOLATE FILLING AND ICING

3 cups confectioner's sugar
1/2 cup butter
1/2 cup milk
1/2 cup cocoa
1/2 cup sugar

To sugar add boiling water very slowly to make a smooth paste; add vanilla, melted chocolate and orange peel. Spread between layers and on top of cake.

THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of “digitized reserve” towards the buying public is just as surely retarding his own business growth.
